

CHIRAG PANCHAL

Pune, India | +91 8806926274 | cjpanchal08@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Data Analyst / Data Scientist with a B.Tech in Computer Engineering (CGPA 8.05, MIT World Peace University) and an Executive PG in Data Science & AI (IIIT Bangalore). Experience building Power BI dashboards and machine learning models for banking and retail clients, translating raw data into decisions used directly by business and credit teams. Published, peer-reviewed CNN research (92% accuracy, IEEE Xplore). Proficient in Python, SQL, scikit-learn, TensorFlow, and Power BI/DAX — from data cleaning and feature engineering through statistical analysis, predictive modeling, and stakeholder-facing visualization.

CORE SKILLS

Programming & Data: Python, SQL (MySQL), Pandas, NumPy, Data Cleaning, Statistical Analysis

Machine Learning: scikit-learn, TensorFlow, Keras, CNN, Transfer Learning, Random Forest, K-Means Clustering, Logistic Regression, Predictive Modeling, Feature Engineering, Cross-Validation, Model Evaluation

BI & Visualization: Power BI, DAX, Power Query, Data Modeling, Star Schema Design, Dashboard Development, Tableau, Matplotlib, Seaborn

Tools & Platforms: Jupyter Notebook, Google Colab, VS Code, Excel, Git

EXPERIENCE

Data Science Intern — Unique System Skills (India) Pvt. Ltd., Pune Dec 2025 – Jun 2026

Loan Risk Analysis Dashboard — Banking / FinTech Client | Power BI · DAX · Power Query · Data Modeling

- Built an interactive Power BI dashboard over 10,000+ customer records, giving the client's credit team segmented borrower views by loan intent, home ownership, and income tier to speed up credit-risk review.
- Replaced manual Excel reporting with live DAX measures and KPI cards tracking default rate and interest-rate trends, cutting reporting turnaround from a manual, periodic process to real-time self-serve monitoring.
- Surfaced key default-rate drivers through borrower segmentation analysis, directly informing the credit team's underwriting review process.

Retail Store Performance Analytics — Retail / E-Commerce Client | Python · scikit-learn · Random Forest · K-Means · Power BI

- Built an end-to-end machine learning pipeline classifying pan-India retail outlets into High/Medium/Low performance tiers using revenue, footfall, and seasonality features, guiding resource allocation across the network.
- Engineered features and validated model performance using cross-validation to ensure reliable tier predictions across regions.
- Shipped a Power BI report with region/city filters that turned model output into a self-serve tool, removing the need for stakeholders to request custom data pulls.

PROJECTS

Automated Waste Segregation System — IEEE Xplore Published Research Dec 2023

Python · TensorFlow · Keras · CNN · Transfer Learning

- Built a CNN with transfer learning and data augmentation reaching 92% classification accuracy, a 15%+ lift over baseline; published as peer-reviewed research in IEEE Xplore.

Insurance Fraud Detection System — Personal Project Nov 2024

Python · scikit-learn · Logistic Regression · Random Forest

- Built Logistic Regression and Random Forest classifiers to flag fraudulent insurance claims, engineering features from claim, policy, and customer attributes to improve model precision and reduce false positives.

Customer Churn & Retention Analytics Dashboard — Personal Project Jul 2026

Power BI · DAX · Power Query · Star Schema · Data Modeling

- Designed an interactive Power BI dashboard analyzing customer attrition drivers and retention patterns, building a star-schema data model and custom DAX measures to quantify customer loss and revenue impact.

EDUCATION

B.Tech, Computer Science Engineering — MIT World Peace University, Pune Jul 2021 – Aug 2024

CGPA: 8.05 | Coursework: Python, SQL, Data Structures & Algorithms, Database Management, Statistics

Executive PG Certificate, Data Science & AI — IIIT Bangalore (Online) Oct 2024 – May 2025

Coursework: Machine Learning, Deep Learning, Model Deployment, Business Analytics, AI Ethics

ACHIEVEMENTS & CERTIFICATIONS

- IEEE Xplore Publication (2023) — “An Automated System for Waste Segregation Using Deep Learning Algorithms”; Data Science Internship & Course Completion Certificates — Unique System Skills (India) Pvt. Ltd. (Jun 2026)
