

CHIRAG PANCHAL

Pune, India | +91 8806926274 | cjpanchal08@gmail.com | [Linkedin](#)

SUMMARY

Data Science & ML professional (B.Tech Computer Engineering, CGPA 8.05, MIT World Peace University; Executive PG in Data Science & AI, IIIT Bangalore) with hands-on experience shipping client-facing Power BI dashboards and ML models for a pan-India retail network. Published, peer-reviewed CNN research (92% accuracy, IEEE Xplore). Strong in Python, TensorFlow, scikit-learn, and Power BI — from feature engineering and model tuning through to insights stakeholders act on.

CORE SKILLS

Languages & Data: Python, SQL (MySQL), Pandas, NumPy

ML / DL: TensorFlow, scikit-learn, CNN, Transfer Learning, Random Forest, K-Means, Logistic Regression, Cross-Validation

BI & Visualization: Power BI, DAX, Power Query, Data Modeling, Tableau, Matplotlib, Seaborn

Tools: Jupyter, Google Colab, VS Code

EXPERIENCE

Data Science Intern — Unique System Skills (India) Pvt. Ltd., Pune

Dec 2025 – Jun 2026

Loan Risk Analysis Dashboard — Banking / FinTech Client

Power BI · DAX · Power Query · Data Modeling

- Built an interactive Power BI dashboard over 10,000+ customer records, cutting credit-risk review time via segmented borrower views by loan intent, home ownership, and income tier.
- Replaced manual Excel reporting with live DAX measures and KPI cards for default-rate and interest-trend monitoring, used directly by the client's credit team.

Retail Store Performance Analytics — Retail / E-Commerce Client

Python · scikit-learn · Random Forest · K-Means · Power BI

- Built an end-to-end ML pipeline classifying pan-India retail outlets into High/Medium/Low performance tiers from revenue, footfall, and seasonality data, guiding resource allocation across the network.
- Shipped a Power BI report with region/city filters that turned the model output into a self-serve tool for business stakeholders.

PROJECTS

Automated Waste Segregation System — IEEE Xplore Published — Research Project

Dec 2023

Python · TensorFlow · Keras · CNN · Transfer Learning

- Built a CNN with transfer learning and data augmentation reaching 92% classification accuracy, a 15%+ lift over baseline; published as peer-reviewed research in IEEE Xplore.

Insurance Fraud Detection System — Personal Project

Nov 2024

Python · scikit-learn · Logistic Regression · Random Forest

- Built Logistic Regression and Random Forest classifiers to flag fraudulent insurance claims, engineering features from claim, policy, and customer attributes to improve signal quality.

EDUCATION

B.Tech, Computer Science Engineering — MIT World Peace University, Pune

Jul 2021 – Aug 2024

CGPA: 8.05 · Machine Learning, Deep Learning, Data Structures & Algorithms, Database Management, Statistics

Executive PG Certificate, Data Science & AI — IIIT Bangalore (Online)

Oct 2024 – May 2025

Advanced ML, Deep Learning, NLP, Model Deployment, Business Analytics, AI Ethics

ACHIEVEMENTS & CERTIFICATIONS

- IEEE Xplore Publication (2023) — “An Automated System for Waste Segregation Using Deep Learning Algorithms”
- Data Science Internship & Course Completion Certificates — Unique System Skills (India) Pvt. Ltd. (Jun 2026)
